***Response to Amendment***

Receipt is acknowledged of applicant's amendment filed April 22, 2005. Claims 22-51 are pending and an action on the merits is as follows.

Applicant's arguments with respect to claims 22-51 have been considered but are moot in view of the new ground of rejection.

***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 23-51 provisionally rejected under the judicially created doctrine of double patenting over claims 24-32, 34, 35, 37-39, 43 and 45-47 of copending Application No. 10/288,632. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that

Art Unit: 3743

copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

A System and/or cleaning bodies for cleaning tubes of tube bundle type heat exchangers including a plurality of tubes arranged in parallel between two chambers and in which a fluid medium circulates at a temperature greater than 120 degrees C, comprising cleaning bodies for cleaning said tubes of deposits at inner walls of said tubes, wherein said cleaning bodies have contact surfaces for contacting inner walls of said tubes and removing said deposits, and wherein said cleaning bodies are made of a material which maintains said contact surfaces at temperatures greater than 120 degrees C.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### ***Response to Arguments***

Applicant's arguments filed April 22, 2005 have been fully considered but they are moot in view of the above-mentioned Rejection.
